Dear Citizens,

This is the first edition of the document "Budget for Citizens", which presents a certain illustrative guide showing clearly and simply how the revenue is collected and spent from the Budget of the institutions of Bosnia and Herzegovina and international obligations of BiH.

It is our desire that, by introducing a practice of regular publication of this document, we become even more open and accountable to citizens in terms of planning, managing and using the finances of the institutions of Bosnia and Herzegovina.

During the preparatory activities, we have also ensured participation of nongovernmental

organisations, institutions of BiH and citizens by having a survey on the website of the Ministry of Finance and Treasury of BiH with the questions related to the development of this document. Likewise, workshops were organised to create a Methodology for developing and publishing a document titled "Budget for Citizens" of the institutions of BiH and workshops related to the contents of this document as well as proposals of the visual solutions and info-graphic. It is exceptionally important that these activities have included representatives of nongovernmental organisations and institutions of BiH and our goal is for this cooperation to intensify.

The purpose of this document is to enable better availability and understanding of the public about the ways in which the state-level institutions distribute and spend public revenues from the Budget. Having in mind that the money received to the Budget comes from the taxpayers, it is our obligation to use it to the best interest of all the citizens of Bosnia and Herzegovina and also to present clear and understandable data about the sources of the collected funds and their spending. The document is intended for all the persons who would like to be informed about the plans of individual institutions of BiH and also for all those who would like to follow spending of the funds in the implementation of the set goals.

I honestly hope that the "Budget for Citizens" will provide answers to the key questions related to the Budget of the institutions of BiH and international obligations of BiH and that it will also encourage an increasing number of stakeholders to give their opinions and suggestions that will serve as a foundation for the development of the Budget for Citizens in the future.

We are open for an increased participation of citizens in the budgeting process to prepare the future document of "Budget for Citizens", even in addition to the constitutional limitations in the structure of the budget of the BiH institutions. We would like to create a more accessible and understandable budget, since this is one of the initial requirements for improving the management of public finances.

In the end, I would like to express a huge gratitude to the Governments of the Federal Republic of Germany and United Kingdom for their cooperation within the Strengthening Public Institutions Programme in BiH and for their supporting the development of the first Budget for Citizens.

We are looking forward to our future cooperation.

Kind regards,

MINISTER Vjekoslav Bevanda

he money within the **budgets** of governmental institutions at all levels is the money of citizens. Governmental revenues are collected from citizens through taxes and payments of different duties and charges. In addition to this, the revenue also comes from **concessions** for the usage of resources which make a common heritage and belong to all the citizens. Even when the revenues come from loans, citizens are the ones who will have to repay them in the end. Governmental institutions are responsible for the funds within their budgets and they decide in the name of its citizens about the distribution of the collected funds for different purposes.

Having in mind that the budget is also a reflection of **public policies**, it is clear why the countries with a developed democratic culture have a significant interest of the public in many budget-related questions. Citizens want to know and decide on how their money is spent. In this, a basic precondition for citizens to participate in the process of budgetary decision-making is to be informed. In line with that, the task of the authorities is to provide transparency of their work and provide information about all the important questions related to the process of creation, adoption and execution of the budget.

Budget for Citizens is a document which summarizes and explains the basic budget information. This is a report, presented in an accessible format, which uses a simple and clear language understood by the citizens. If they can understand it, the citizens can then achieve their citizens' rights in a democracy - they can ask questions making sure the government explains what they do in the name of citizens. During the development of the very document, numerous individual and group consultations were done with the citizens, representatives of nongovernmental organisations as well as representatives of the institutions of Bosnia and Herzegovina.

Budget

A document forecasting all revenues and expenditures in one year.

Concession

A permission of the government given to legal or physical persons to perform certain business activities according to pre-determined requirements.

Public policy

A plan or course of action of governmental institutions.

Budget for Citizens

A simplified and illustrated overview of certain parts of the official Budget.

Competencies of the institutions of Bosnia and Herzegovina

Pursuant to Article III of the **Constitution** of Bosnia and Herzegovina, the following areas are in the competence of the institutions of Bosnia and Herzegovina:

- a) Foreign policy,
- b) Foreign trade policy,
- c) Customs policy,
- d) Monetary policy,
- e) Financing of the institutions and international obligations of BiH.
- f) Policy and regulation of the issues of immigration, refugees and asylum,
- g) Implementation of the international and inter-entity criminal law regulations, including the relations with the Interpol,
- h) Establishing and functioning of the common and international means of communication,
- i) Regulation of the inter-entity transport,
- j) Air traffic control.

The same article of the Constitution further defines that all the governmental functions and authorisations not explicitly entrusted to the institutions of Bosnia and Herzegovina belong to the entities. At the same time, Bosnia and Herzegovina may take over the competence for issues as agreed upon by the entities; the issues that are defined by Annexes 5-8 of the General Framework Agreement; or those that are necessary to preserve the sovereignty, territorial integrity, political independence and international subjectivity of Bosnia and Herzegovina, in accordance with the division of competences among the institutions of Bosnia and Herzegovina. Additional institutions can be established, if need be, for the purpose of performance of these competences.

Currently, there are 75 **budget users** i.e. different institutions in Bosnia and Herzegovina (ministries, agencies, regulatory bodies, judiciary institutions and such), which are direct users of the Budget of the institutions of Bosnia and Herzegovina and international obligations of Bosnia and Herzegovina.

Legislative framework

The Law on Financing the Institutions of Bosnia and Herzegovina is the law setting out the preparation, adoption, execution, accounting, reporting and supervision of the Budget of Bosnia and Herzegovina. The Budget presents a legal document of the Parliamentary Assembly of Bosnia and Herzegovina, setting out a plan of financial activities of budgetary users, which includes the projection of amounts of revenues and a set amount of expenditures for the period of one fiscal year. This Budget also sets out an upper limit of the overall debt of Bosnia and Herzegovina, including the existing debt and projection of a new debt for the given fiscal year. Equally, the document sets out the budget users, which are all the institutions of Bosnia and Herzegovina and all other bodies financed by the budget as well as regulatory bodies.

The Ministry of Finance and Treasury of Bosnia and Herzegovina is in charge of preparing the budget, executing the budget and financing of the budget institutions, coordination of all activities to ensure the budget funds and investment of public finances and it also performs other activities in the area of financing of budget users in accordance with the Constitution and the law.

Constitution

A basic legislative act of a country establishing a political and legal order.

Budget user

Institutions and all other bodies financed by the budget.

Budget process

The process which includes preparing and adopting the budget, its execution, reporting and control.

Framework Budget Document (FBD)

A projection of three-years' revenues and expenditures, i.e. a mid-term budget projection.

Budget calendar and budget process

Budget calendar is set out by the Law on Financing the Institutions of Bosnia and Herzegovina and it defines the activities significant for the preparation and adoption of the Budget. It defines the timelines and responsibilities of individual institutions with regards to preparing for the adoption of an official Budget.

Budget process is based on prescribed activities of all the participants in the process of preparing and adopting the Budget of the institutions of BiH and international obligations of BiH and also for the execution, reporting and control.

Budget process starts in January, when the Ministry of Finance and Treasury sends out, until 31st of this month, its budgetary instructions with the budget calendar for the preparation of a **Framework Budget Document (FBD)** to all the budget users.

31 December

The BiH Parliamentary Assembly considers the Proposal of the Law on the Budget submitted to the Presidency of BiH and it adopts the Law on Budget in accordance with its own Rules of Procedure.

Macroeconomic projections and forecasts

The beginning of 2020 is characterised by a more complex economic situation due to the occurrence of the COVID-19 virus, which will have quite negative implications on the economic trends in the world, in the region and in the very Bosnia and Herzegovina. The intensity and duration of the newly occurring circumstances will in principle determine the economic growth trends both in the short-term and midterm periods.

The following table shows the **macroeconomic** indicators for the period of 2018-2023, as prepared by the Directorate for Economic Planning of the Council of Ministers of Bosnia and Herzegovina.

Macroeconomics

It is an area of economic sciences dealing with the total economy of an area (country), studying the mutual relations of the total (aggregate) production, revenue, employment, prices and other variables.

Nominal GDP

It is a sum of quantities of manufactured final goods and services by resident units in a country in a certain period of time multiplied by their current prices.

Realistic GDP

It presents a sum of quantities of final goods in permanent (instead of current) prices and it also points out to the quantity of manufactured products and services.

Official data **Indicators Projections** 2019 2020 2021 2022 2023 2018 Nominal GDP in mil. BAM 34,023 35,365 34,283 35,709 37,460 39,226 Nominal growth in % 5.2 3.9 -3.1 4.2 4.9 47 Realistic GDP in mil. BAM 33,399 35,116 34,342 35,330 36,898 38,778 Realistic growth in % 3.3 3.2 -2.9 3.1 3.3 3.5 1.4 0.6 -0.5 1.3 **Inflation** in % 1.2 1.4 Government spending in mil. BAM 6,611 6,776 6,972 7,007 7,231 7,448 Realistic growth in % 0.9 1.0 2.5 -0.2 0.7 0.5 Private consumption in mil. BAM 25,437 26,155 25,377 26,229 27,197 28,247 Realistic growth in % 2.3 2.0 -2.8 2.1 2.3 2.0 Import in mil. BAM 19,097 19,955 18,435 19,497 20,848 22,542 Export in mil. BAM 14,087 14,850 13,515 14,571 15,810 17,289 According to the currently available preliminary data of the Agency for Statistics of Bosnia and Herzegovina, it is assessed that Bosnia and Herzegovina achieved an economic growth of about 2.6% in 2019 compared to the previous year¹.

The most up-to-date reference document of the IMF "World Economic Outlook, April 2020, The Great Lockdown" forecasts a drastic drop of the world economy of 3% in 2020, depending on the duration and intensity of COVID-19 pandemic spreading. According to these projections, the expected drop of **GDP** in developed countries amounts to 6.1%, whereas in the developing countries the GDP is expected to decrease by 1%².

A 7.5% drop of GDP is also envisaged for the EU countries, at which the expected GDP decline by countries amounts to: Germany 6.5%, Italy 9.5%, Austria 5.5%, Croatia 9.1% and Slovenia 7,0%³.

If we have in mind that the economic trends in the EU and the aforementioned countries in the past have presented the main structural determinant of the economic trends in Bosnia and Herzegovina (production, consumption and foreign trade exchange), it can be concluded that the consequences of these events to the overall economic trends in the country will be rather unfavourable.

In the course of 2020, government spending is expected to decline by 2.8% in a realistic sense compared to the previous year. The main determinant of this decline of private consumption is presented by a certain drop of the number of employees, decreased salary and remittances from the citizens abroad, which will significantly decrease the available citizens' income. This will certainly affect the amount of collected taxes, thereby affecting the very public revenue.

However, a much stronger growth of **public spending** is expected in the year of 2020, compared to the multi-annual average, and it will amount to 2.5% compared to the previous year, positively contributing to the very economic growth.

Economic growth

It implies a total growth of production, production capacities and all other parts of one economy, i.e. it shows the total growth of total output of an economy due to the growth of its labour force, capital goods and improvements in technology and productivity.

Gross Domestic Product (GDP)

It is a macroeconomic indicator showing the value of final goods and and services produced in the country in one year, as expressed in monetary units.

Inflation

It is an increase in the general level of prices compared to the value of money.

Government/public spending

(Expenses for the final government spending) – The sector of government consists of all the institutional units which, through the meeting of their political obligations and role of economic regulation, in principle produce the non-market services (possibly also non-market goods) for individual or collective consumption and they also redistribute the proceeds and wealth. Expenses for final government spending include two categories of expenditures:

- Non-market output; except for investments for own account; which is measured by costs of production, decreased by occasional sale.
- Government procurement of goods and services from the market producers, which are sold to households without any transformation, as a social transfer in "kind".

Foreign trade exchange

It is an overall exchange of goods and services on one country with foreign countries (import and export of goods and services).

- ² IMF, "World Economic Outlook, April 2020, The Great Lockdown".
- ³ DG ECFIN, "Spring 2020 Economic Forcast: A deep and uneven recession, and uncertain recovery", May 2020.

REVENUES, PROCEEDS AND FINANCING

BiH institutions' budget revenues are planned on the basis of the Global Framework of the Fiscal Balance and Policy in Bosnia and Herzegovina for 2020-2022 period.

The basic revenue within the Budget of the Institutions of Bosnia and Herzegovina and International Obligations of BiH for 2020 is related to the tax revenue, i.e. revenues from the Single Account of the Indirect Taxation Authority for Financing of the Institutions of BiH (BAM 780,000,000).

Other proceeds and support to financing of the BiH institutions are related to the non-tax revenues (BAM 146,082,000), transfers from other levels of government (BAM 502,000) as well as current support from abroad (BAM 215,000).

Financing and proceeds include also the transferred surplus from the previous years (BAM 68,175,000), proceeds from succession (BAM 682,000) as well as proceeds from sale of permanent assets (BAM 344,000).

In the end, it should be added that the Budget revenues includes the revenue for public debt financing (BAM 807,552,931), which is allocated by end debtors, i.e. by the state-level and entities.

Succession

It means taking over of the rights and obligations of the previous country (predecessor) by a new state (successor) with regards to a number of issues significant for this area, which are the consequence or expansion of government, i.e. establishing of sovereignty and state which has, until that time, belonged to a different state.

Transferred surplus of funds from the previous years

> Proceeds from sale of permanent assets BAM 344.000

AND **PROCEEDS**

Proceeds from succession BAM 682.000

Tax revenues BAM 780.000.000

Non-tax revenues BAM 146.082.000 -

Revenues from the interest and exchange rates' di-

• **Revenue from fines –** Revenues from fines in criminal ment and Residence of Foreigners in Asylum, etc.

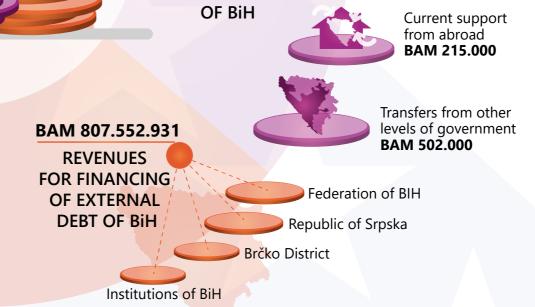

• Own revenues – Revenues collected within the competences of the Service for Common Affairs of the Institutions of BiH. Institute for Standardisation of BiH. Institute of Metrology of Bosnia and Herzegovina, Institute for Intellectual Affairs of BiH and Institute for Accreditation of BiH.

Permanent assets

A part of property that will remain unchanged, i.e. it will keep the same appearance in a time period longer than one year and which will not be spent in a normal, production cycle (for example, land, buildings, machinery, etc.). These are procured with an intention to be used in own business and not for further sale.

Transfers from other levels of government

Monetary funds that the higher or lower levels of government allocate to the budget with the goal of implementation of individual programmes and/or functions.

govina is shown within non-tax revenues: • Revenues from administrative fees/charges - Reve-

nues from the issuance of permits in international road traffic, revenues from the issuance of documents by the diplomatic-consular network, revenues from applications, requests, reports and other submissions, revenues from appeals, revenues from the issued certificates.

THE LARGEST USERS OF THE BUDGET OF BOSNIA AND HERZEGOVINA INSTITUTIONS

When observing expenditures in 2020, it is visible that 10 budget users with the largest expenditures account for as much as BAM 683,245,000, i.e. 68.60% of the total expenditures of the Budget of the institutions of BiH (excluding allocations for the external debt). Hence, the **Ministry of Defence** expenditures are allocated as much as **BAM 287,341,000**, i.e. 28.85% of the total expenditures, whereas the **Indirect Taxation Authority** and **Border Police** are allocated the amounts of **BAM 100,510,000 (10.09%)** and **BAM 81,716,000 (8.20%)**.

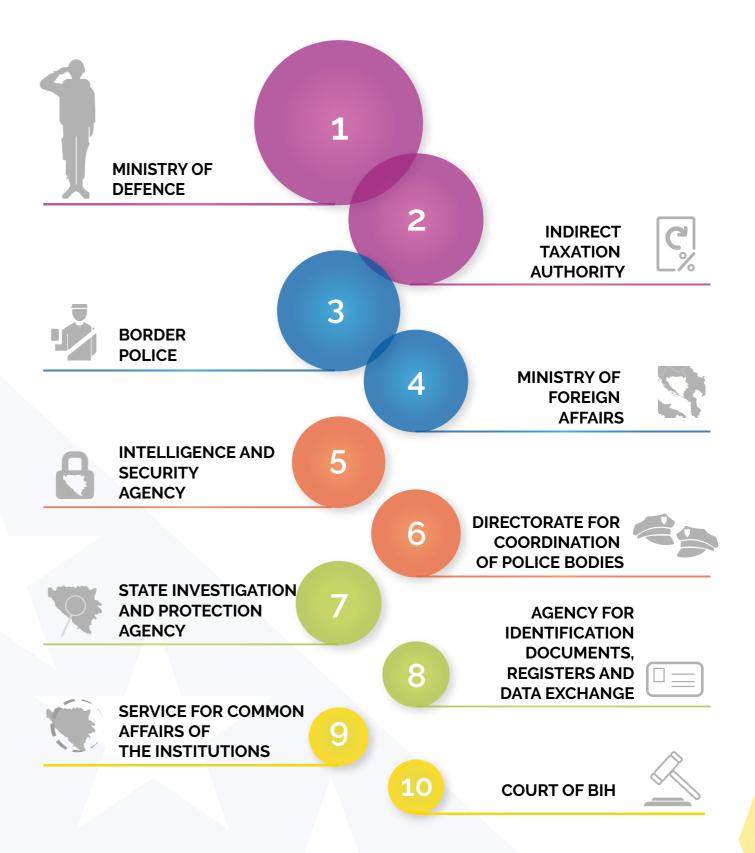

The other 10 budget users with the largest expenditures include

- **Ministry of Foreign Affairs** with **BAM 53,426,000** i.e. 5.36% of the total expenditures.
- Intelligence and Security Agency with BAM 36,495,000 i.e. 3.66% of the total expenditures.
- **Directorate for Coordination of Police Bodies** with **BAM 33,380,000** i.e. 3.35% of the total expenditures.
- State Investigation and Protection Agency with BAM 30,836,000 i.e. 3,10% of the total expenditures.
- Agency for Identification Documents with BAM 23,665,000 i.e. 2,38% of the total expenditures.
- Service for Common Affairs of the Institutions with BAM 19,183,000 i.e. 1,93% of the total expenditures.
- **Court of BiH** with **BAM 16,693,000** i.e. 1,68% of the total expenditures.

The above-mentioned clearly shows that the largest funds from the BiH Budget, which is planned to finance the institutions, is allocated for the sectors of defence and public order and security.

The following part gives an overview of the costs for salaries and allowances of employees as well as the budget of 6 institutions which, according to the conducted consultations, were the largest focus of attention of the interested individuals and civil society organisations.

Primarily, these are the institutions spending the largest amounts of funds when performing the competences entrusted with (Ministry of Defence, Border Police and Indirect Taxation Authority) as well as the institutions whose work is of great interest due to individual programmes and projects implemented within them (Ministry of Civil Affairs, Ministry of Human Rights and Refugees and Ministry of Foreign Affairs).

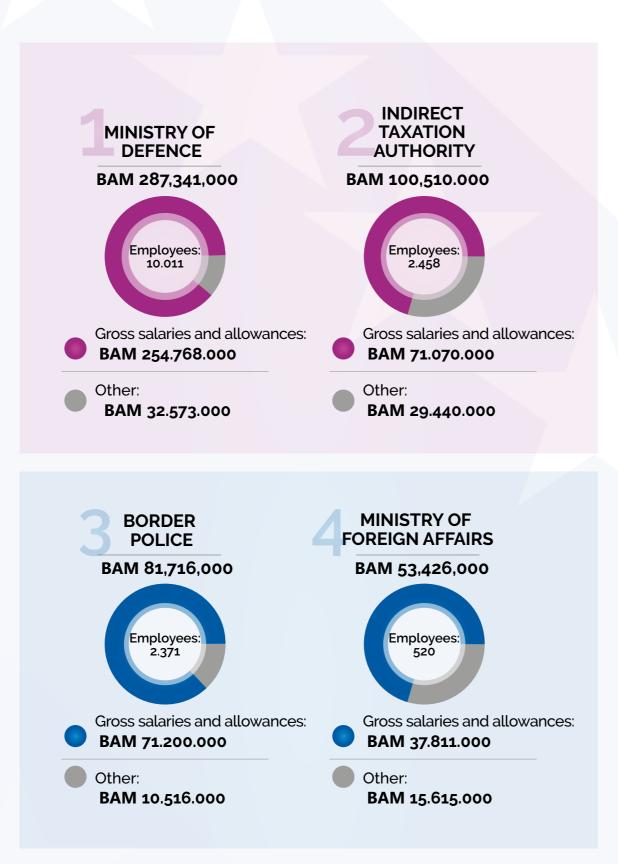

Budget for Citizens of the institutions of Bosnia and Herzegovina and international obligations of Bosnia and Herzegovina 21

SHARE OF SALARIES AND ALLOWANCES FOR EMPLOYEES OF THE LARGEST BUDGET USERS

At the same time, as was the case in the part with total expenditures, within these 10 institutions, the largest amount of budget funds is allocated for salaries and allowances, having in mind a large number of employees in the aforementioned institutions.

Other expenditures within the aforementioned institutions are related to the expenses related to the needs of their undisturbed functioning, including several capital projects, which will be presented in more details in the part related to the individual institutions.

Budget for Citizens of the institutions of Bosnia and Herzegovina and international obligations of Bosnia and Herzegovina 23

MINISTRY OF DEFENCE

BAM 287,341,000

The Ministry of Defence of Bosnia and Herzegovina together with the Joint Staff of the Armed Forces of Bosnia and Herzegovina, as its professional body, performs the works and duties in the area of defence, and are all in a single defence system under the supreme command and control of the Presidency of BiH.

PROGRAMME AND PROJECT STRUCTURE OF EXPENDITURES

Military defence BAM 262,454,000 BAM 28,200,000

Providing of military assistance and cooperation with civil bodies in case of natural disasters and other accidents

BAM 10,472,000

Implementation of the NATO norms in the area of warehousing (operations with weapons and ammunition and mines and explosives)

BAM 25,000,000
Anti-mine action in BiH

BAM 8,000,000

Resolving the surpluses of weapons, ammunition and mines and explosives

BUDGET GLOSSARY

Budget – a document forecasting all revenues and expenditures in one year.

Concession – a permission of the government given to legal or physical persons to perform certain business activities according to pre-determined requirements.

Public policy – a plan or course of action of governmental institutions.

Budget for Citizens - a simplified and illustrated overview of certain parts of the official Budget.

Constitution – a basic legislative act of a country establishing a political and legal order.

Budget user – institutions and all other bodies financed by the budget.

Framework Budget Document (FBD) – a projection of three-years' revenue and expenditures, i.e. a mid-term budget projection.

Macroeconomics – it is an area of economic sciences dealing with the total economy of an area (country), studying the mutual relations of the total (aggregate) production, revenue, employment, prices and other variables.

Nominal GDP - It is a sum of quantities of manufactured final goods and services by resident units in a country in a certain period of time multiplied by their current prices.

Realistic GDP - It presents a sum of quantities of final goods in permanent (instead of current) prices and it also points out to the quantity of manufactured products and services.

Economic growth - It implies a total growth of production, production capacities and all other parts of one economy, i.e. it shows the total growth of total output of an economy due to the growth of its labour force, capital goods and improvements in technology and productivity.

Transfers from other levels of government - Monetary funds that the higher or lower levels of government allocate to the budget with the goal of implementation of individual programmes and/or functions.

Gross Domestic Product (GDP) - It is a macroeconomic indicator showing the value of final goods and and services produced in the country in one year, as expressed in monetary units.

Inflation – It is an increase in the general level of prices compared to the value of money.

Government/public spending - (Expenses for the final government spending) – The sector of government consists of all the institutional units which, through the meeting of their political obligations and role of economic regulation, in principle produce the non-market services (possibly also non-market goods) for individual or collective consumption and they also redistribute the proceeds and wealth. Expenses for final government spending include two categories of expenditures:

-Non-market output; except for investments for own account; which is measured by costs of production, decreased by occasional sale.

-Government procurement of goods and services from the market producers, which are sold to households without any transformation, as a social transfer in "kind".

COFOG Classification - Classification of governmental function (COFOG – Classification of the Functions of the Government) was published by the Department for Statistics of the United Nations and it is related to the funds from the budget classified by the purposes, which these are spent for.

Succession - It means taking over of the rights and obligations of the previous country (predecessor) by a new state (successor) with regards to a number of issues significant for this area, which are the consequence or expansion of government, i.e. establishing of sovereignty and state which has, until that time, belonged to a different state.

Permanent assets – It means a part of property that will remain unchanged, i.e. it will keep the same appearance in a time period longer than one year and which will not be spent in a normal, production cycle (for example, land, buildings, machinery, etc.). These are procured with an intention to be used in own business and not for further sale.

QUESTIONS, COMMENTS AND SUGGESTIONS
